

5th March 2026

Dear parents, carers, guardians & families

We are pleased to inform you that from **Monday 9th March to Friday 13th March**, new solar panels will be installed on the school roof.

As part of the installation process, **scaffolding will be erected around designated areas of the building**. Please be assured that all necessary safety measures will be carefully implemented throughout the project. The work will be carried out by fully qualified contractors, and safeguarding the children, staff, and visitors will remain our highest priority. Access to scaffolding areas will be securely restricted at all times.

This is an exciting development for our school community. The addition of solar panels represents a significant step forward in reducing our energy costs and improving our environmental sustainability. By generating renewable energy on-site, we will be able to save money that can be redirected to support pupils' learning, while also helping to reduce our carbon footprint.

We appreciate your understanding during this short period of installation and thank you for your continued support.

If you have any questions, please do not hesitate to contact the school office.

Yours sincerely
Mrs K A Swales
Headteacher
